## V-Net 8

*Give Your Clients Online Access to Depositions Including Synced Video/Transcripts*

**V-Net 8** is an internet repository tool that is designed to provide secure online access to the entire deposition including synchronized videos with scrolling transcripts and hyperlinked exhibits.

**V-Net 8** has a unique data viewer that allows your clients to view, print or download all the parts of a deposition including text, PDF files and exhibits from virtually anywhere in the world.

Your clients will never need to be burdened with having to save large files to their systems, because **V-Net 8** is also an online repository. To give your clients secure access, simply create a Digital Access Key (DAK) for each deponent. When they login, they will see only the case files associated with that DAK. Once the case is over, simply delete that DAK. V-Net integrates with your existing website, so giving your client access will be seamless.

Now you can give your clients secure access to deposition files from anywhere at anytime at an affordable price without any monthly fees.

**Call us today to see why agencies trust V-Net 8 to securely store their deposition files.**
