Visionary Scan Exhibit and Document Production Imaging Tool

Visionary Scan is a production tool designed specifically for viewing, coding and creating OCR files for deposition exhibits. It combines a rich set of quality control and productivity features in a simple interface. **Visionary Scan** is intended to provide court reporting firms, videographers and litigation support professionals with an easy-to-use scanning software.

Visionary Scan creates image load files compatible with all major litigation support and trial presentation packages. It can also create Visionary Image Group (.vig) files for use with the Visionary Auto-Syncer, which can hyperlink exhibits to the associated transcript for use in other Visionary products. Now you can create a complete multi-media record on a single disk.

Visionary Scan allows you to create a multitude of load files that are compatible with Visionary, Concordance, Summation, TrialDirector, Sanction and other popular litigation management and trial presentation software.

**Call us today to see why legal professionals trust
Visionary Scan for their imaging needs.**
